ARMY WELLNESS CENTER

»» *Vicenza*

The Army Wellness Center (AWC) offers standardized services designed to achieve and sustain a healthy lifestyle. The Army Wellness Center Vicenza will assist you with creating goals, monitoring progress and maintaining motivation. The health and wellness services are offered at no cost to service members, family members, retirees and DA civilians. Services and education can be offered in an individual or group (unit) setting.

SERVICES OFFERED:

Body Composition Assessment (BOD POD)

Determine your body fat percentage. Scales or BMI cannot identify how much of your weight is fat, muscle or body water, but body composition can. Utilize body composition to track weight loss because it differentiates fat and fat-free weight.

Resting Metabolic Rate Assessment

Determine how much energy (calories) your body burns at rest (Resting Metabolic Rate). With this assessment, AWC can provide tailored strategies for weight loss, maintenance or weight gain.

Note: Upping Your Metabolism Class is a prerequisite.

Strength and Flexibility Assessment

Determine your level of grip strength, back strength and flexibility compared to your peers (gender and age). This can help identify areas for improvement.

Health Coaching Sessions

- One-on-one session to focus on exercise review.
- Evaluate your current plan and progress or discuss starting a new exercise program that is tailored toward you and your unique health goals.

EDUCATION OFFERED:

Upping your Metabolism

Learn how to influence your metabolism through exercise and nutrition.

Fueling for Health

Learn the fundamentals of healthy eating, dietary guidelines and food labels.

Meals in Minutes

Learn how to overcome the challenges and myths associated with healthy meal preparation. Develop the tools and skills to prepare healthy meals in a timely manner.

Stress Management

Learn stress relief techniques, positive coping skills and training on biofeedback. Deep breathing, guided imagery, progressive muscle relaxation and mindfulness meditation are utilized.

Performance Optimization

Learn about the aspects of fitness being assessed for the ACFT. Review technique, form and exercise planning to improve overall physical fitness.

Healthy Sleep Habits

Learn about the influence sleep has on health and well-being. Review tools, tips and positive action steps to improve your ability to fall and stay asleep. ■

HEALTH CARE IN ITALY

The overall quality and performance of Italy's universal health system ranks favorably compared to international standards. Health care access and quality as well as life expectancy rank among the highest globally. Though health care in Italy is not free, the fees are usually reasonable and emergency medical assistance is provided to anyone in need without asking for up-front payment.

WHAT TO EXPECT DURING YOUR VISIT

The health and dental care culture is different in Italy than what you might be used to. Understanding these differences will help you feel less nervous about going to an Italian provider.

Undressing is normal – Doctors will not hesitate to ask you to undress in front of them as they continue talking to you or calling in a specialist to greet you as you are partly dressed.

Things may not always happen quickly – Just as in the U.S., Italian health care can be slow. Address your concerns with the receptionist, even rescheduling your appointment if you need to. Going in with a good attitude, patience and understanding will make for a better experience.

In order to have affordable health care, many hospitals may not issue basics such as towels, gowns, soap and other toiletries, so be prepared to bring your own.

WHAT YOUR ITALIAN PROVIDER EXPECTS

Italians value quality of life over money. Below are some best practices to remember when seeing an Italian provider.

Courtesy – Please show up to your appointment. If you can't make it, let your provider know. If you do not show, you could be charged for the missed appointment.

Patience – If you find yourself waiting past your scheduled appointment time, be patient or notify the staff and reschedule your appointment.

Understanding – Understand that health care in Italy may be different than what you are used to.

INSURANCE PROVIDERS

In most cases, when you see a provider off-installation, you will have to pay your bill up-front, then submit a claim to your insurance provider for reimbursement. Ask for the cost of the visit in advance so you are prepared to pay for it.

FLEXIBLE SPENDING ACCOUNTS

Health Care FSA (HCFSA) – Reimburses you and your dependents for eligible out-of-pocket health care expenses from copayments to deductibles and more. Check with FSAFeds or your employer program for specific details.

INSURANCE

Below is a partial list of insurance companies for civilians in the community. Self-filing processes will vary so contact your insurance agency for specific instructions. Be sure to become familiar with your specific plan, the self-filing process, reimbursement, covered providers, etc. Your insurance company may also cover translation and/or interpreter services. Consult with your insurance company for more information.

Foreign Service Benefit Plan (FSBP/AFSPA) - Uses the Aetna Choice POS II (Open Access) network and considers all covered providers outside the U.S. and Guam (including Military Treatment Facilities)

Blue Cross Blue Shield Federal Employee Program (FEPBlue/GMMI) - For overseas benefits, covered services are paid at the preferred level. Physician care performed outside the U.S. is paid at the preferred level using their Overseas Fee Schedule or a provider-negotiated amount.

Government Employees Health Association (GEHA) - Providers outside the U.S. are paid at the GEHA preferred provider rate for medically necessary covered services. You will need to check your plan brochure for specifics.

Compass Rose Health Plan - If you need medical care outside the U.S., you may see any health care provider or visit any hospital.

TRANSLATION SERVICES

Some health care providers may not be proficient in speaking English and may not provide documents or bills written in English. Additionally, your insurance company may require bills to be translated to English prior to reimbursements.

HERE IS A LIST OF TRANSLATION AGENCIES IN THE VICENZA AREA:

▲ **Point Translations:**

0495 975777

www.puntotraduzioni.com

▲ **Rapitrad:**

0444 267446

www.rapitrad.it

▲ **Studio Center Quarter:**

Get set up with TRICARE OVERSEAS

TRICARE PRIME ACCESS

Enrollment in TRICARE Prime can be completed during in-processing or at the TRICARE Service Center (TSC). TRICARE Prime access-to-care standards assure that beneficiaries receive timely, quality care. If timely care is unavailable at the military treatment facility (MTF) near you, you may be referred to another MTF or to a host-nation provider or hospital.

 Except for emergencies involving the immediate threat of loss of life, limb or eyesight, all off-post care you receive must be authorized by International SOS first. In most cases you will work with your TRICARE Service Center to obtain authorization.

Active-duty military and their command-sponsored family members will be scheduled for appointments in accordance with these standards:

NON-TRICARE PRIME

Beneficiaries, including military retirees, DoD civilian employees and eligible third-party payees, may be seen at an MTF on a space-available basis. They should check

appointment schedules regularly. To assure continuity of care, it is recommended that military retirees and third-party payees also establish relationships with host-nation providers.

YOUR LOCAL TRICARE SERVICE

Be sure to visit your local TRICARE Service Center (TSC) during in-processing to verify your TRICARE eligibility and enrollment status. Don't forget to take your ID card and check your DEERS registration and address. You can update your address in DEERS online at www.tricare.mil/DEERS.

Advisors at your local TSC can give you host-nation provider names and phone numbers, a map with driving directions and other useful information. They can also help you understand medical documentation and bills. TSC staff can also help schedule your initial appointment with a host-nation provider, or you can call the host-nation provider office directly to book your own appointment, or contact International SOS at 0800-589-1599 to assist you in booking your appointment. ■

EVERYTHING YOU NEED TO KNOW ABOUT PATIENT LIAISONS

Living overseas can bring changes and challenges for many Americans in Europe. One difference that may present a challenge is host-nation health care. There are things that can be done to help ease the worry when facing a visit to a host-nation treatment center.

PATIENT LIAISONS

Located at MTFs in Italy, host-nation patient liaisons are available for TRICARE beneficiaries and; as time allows, other U.S. citizens affiliated with the military community.

Patient liaisons can:

- Accompany patients to their first visit to a host-nation provider (per request).
- Help coordinate from an MTF to a host-nation medical facility or from a host-nation facility to MTF by civilian ambulance or a privately owned vehicle.
- Ease language barriers between patient and host-nation providers.
- Upon beneficiary's request, talk to host-nation providers about a patient's medical condition and treatment plan to facilitate patient understanding and comprehension.
- Answer questions about treatments, medical forms and host-nation hospital environment or culture.
- Familiarize you with host-nation medical practices.
- Assess and interpret patient concerns to determine specific assistance needs.
- Visit daily to assess treatment progress or plans for the patient's transfer to another hospital or MTF.
- Assist with the discharge of a patient from a host-nation treatment center.

If you need emergency care, ask the hospital to contact a patient liaison or call your local MTF or TSC to arrange a meeting. Once you have made contact, your patient liaison will help with any questions or needs. The patient liaison program is available through RHCE and is open to TRICARE Beneficiaries. Patient liaisons are available for calls 24 hours a day.

To find your local TRICARE service center, go online to www.tricare.mil/ContactUs/callus. To find your local liaison, click on the location nearest to you. If the phone number is not listed, contact TRICARE on how to contact your local liaison.

BE PREPARED

Anticipate any health care emergency you may have and learn the location of local clinics and hospitals both in close proximity and in the general area. Have a bag packed of key items you would need in an emergency, including a list of medications, local currency and toiletries. Host-nation hospitals do not provide personal effects or toiletries, but if you forget or are unable to bring those, the hospital will generally have a store where you can purchase them. For a complete list of what to bring, see the suggestions below.

What to bring with you to the hospital:

- Photo ID card
- Bilingual dictionary
- List of current medications
- Local currency
- Bottled water
- Notebook and pen
- Towel/washcloths
- Pajamas, slippers, robe
- Personal hygiene items/lipbalm
- Reading materials
- Snacks/hard candy
- Clothing for discharge
- Tablet device or laptop with earphones

TREATMENT DIFFERENCES

Medication is another area that differs from the American medical system. Many European doctors try homeopathic remedies to medicate their patients. If you are in pain or are not responding well to these treatments, stronger prescriptions are available. Talk with your doctor and patient liaison about your needs and concerns. Inform your medical team of prescriptions you currently use, ask your doctor questions and seek help with your patient liaison if a language barrier exists.

You may find a difference in privacy as well. Hospital rooms are double occupancy and may have no privacy screens between beds. Take appropriate clothing that allows you to remain semi-dressed during exams. Additionally, host-nation doctors may not always have a chaperone when examining a patient of the opposite sex. If you feel uncomfortable, ask for an additional person. Remember, you can say no. If you want to leave your room, make sure to get dressed. Most European patients will not stay in their gowns all day. Also, if you plan on leaving the ward, let the nursing staff know.

Despite the differences between host-nation and American health care, treatment standards are the same; you will be treated fairly and with a great deal of respect. As one patient of an Italian hospital put it, "The staff makes you feel like it's a pleasure to assist you." ■

Our team consists of experienced professionals who work closely together, offering each patient a complete and attentive approach in order to guarantee their safety and satisfaction.

ITALIAN PHARMACIES

Italian pharmacies, or “farmacie,” is a place you will need to be accustomed to when living in Italy. They are the first stop if you have a cold or an upset stomach. There are no chain pharmacies in Italy, but farmacie are universally recognizable by the green plus-sign. Pharmacies and their opening hours are regulated by law and operate on a “rota” system to ensure an open pharmacy for medical emergencies at any time. Every pharmacy will display a card identifying its own opening hours, emergency number and instructions for emergency services outside of the opening hours.

When you walk into the farmacie, you will need to wait in line and talk to the pharmacist to get whatever you need for treatment, even if it is considered “over the counter.” Medications such as ibuprofen are not on open shelves, but you will not need a prescription to get them.

Italian pharmacists are likely to ask a series of questions in order to discern which remedy best suits your problem. Since a stuffy nose might be allergies or a head cold, the treatments are different; Italian pharmacists are well-qualified to provide advice about minor ailments and dispense appropriate prescriptions. Be prepared to talk to the pharmacist as if they were your doctor by describing symptoms and answering questions.

As with doctors and dentists, pharmacists may speak limited English, so it is a good idea to come prepared with a translated list of symptoms or use a translation app on your mobile device.

If you have a prescription from your Italian provider, simply hand it to the pharmacist and they will take care of the rest. Have your Codice Fiscale on hand, the pharmacist may ask to see it if the medication is something other than “over-the counter.” Note that opiates, narcotics or other closely regulated medications are difficult or sometimes impossible to get filled in Italy. ■

AMERICAN MEDICATIONS and their Italian equivalents

These equivalents are provided to help you purchase over-the-counter medication at the Italian pharmacy.

If you have any questions about how to take the medication, please call your doctor.

FILLING A PRESCRIPTION

at your on-installation pharmacy

It is important to know the pharmacy will fill prescriptions in the USAHC-V pharmacy only if the prescription is written to standard. Cut out this handy example and provide to your network providers when they are writing prescriptions to be filled. The medication must be something carried by the USAHC-V pharmacy as an FDA approved medication.

✓ **Please Note: All of the following elements must be met and written in English to be considered valid**
 (Attenzione: tutti i seguenti elementi devono essere compilati e scritti in inglese per venire considerati validi)

✓ **Be sure prescription is typed or use ink**
 (Assicurati che la prescrizione sia scritta a computer o con inchiostro in modo leggibile)

✓ **No controlled substances may be prescribed**
 (Non è possibile prescrivere sostanze stupefacenti o psicotrope)

Dedicated and tailored medical, psychological and physiotherapeutic support will be offered to our patients, tailored to their needs.

PSYCHOLOGICAL/MEDICAL AND PHYSIOTHERAPEUTICAL SUPPORT

Thanks to our psychological support team and physical/orthopedic/neurosurgical rehabilitation team we are also able to create personalized mental and physical therapeutical cycles, ranging from PTSD treatment to dislocation and fracture surgeries and rehabilitation.

✓ We offer specialized services for performance enhancement and physical or mental endurance enhancement packages. We use the latest technologies and best professionals in the sector to achieve this.

✓ Thanks to our PEMF machines and Hyperbaric chamber we use evidence-based medicine to help military personnel improve the physical and mental performances, both before deployment and as part of rehabilitation and maintenance after their deployment.

ANTI-AGING AND PHYSICAL ENHANCEMENT TREATMENTS

Your body needs adequate supply of oxygen to function. When tissues are injured, it requires even more oxygen to survive. We use advanced hyperbaric chamber build with aluminum and titanium in specific protocols to offer a dedicated hyperbaric oxygen therapy (HBOT) to help in different fields:

Reverse the Anti-aging process! - Hyperbaric treatment can actually reverse the aging process by acting on the senescent (aging and dying) cells and to the telomeres at the ends of the chromosomes which grew longer instead of shorter.

Aiding in Post traumatic Stress disorder (PTSD) – Studies shows that hyperbaric oxygen therapy (HBOT) treatments provide high percent oxygen delivered under increased pressure helps treat PTSD.

Enhance physical and cognitive performance – Increased oxygen helps heal damaged brain tissue, reduces inflammation, and promotes the growth of new tissue and blood vessels. This increases mitochondrial respiration and increase in mitochondrial mass.

Tailored treatment to military personnel and their families
We apply specific tailored protocols to military personnel to enhance the physical and cognitive capabilities.

SERVICES WHEN YOU'RE HOUSEBOUND

by Stacy Roman

Having major surgery, an unforeseen illness or debilitating injury can often lead to a hospital stay followed by a lengthy recuperation at home. Often these types of recoveries leave patients homebound or restricted in movement. It can be overwhelming trying to coordinate follow-up appointments, grocery shopping, pet care and other daily tasks—especially in a foreign country. However, there is plenty of help available while you get back on your feet again.

Transportation

Not being able to get behind the wheel can be frustrating and leave you feeling as though you're at the mercy of others for rides. Luckily, there's an app for that. Download the MyTaxi app on any smartphone. Similar to Uber and Lyft (neither of which are available in the Vicenza region), MyTaxi allows you to book the nearest cab, monitor their whereabouts to estimate arrival and get a notification when they've arrived.

Medication delivery

If you're unable to make it to the pharmacy to pick up medications, Vicenza is located within the delivery radius for Pharmap (pharmap.it) – a pharmacy delivery service. Simply download the Pharmap onto your smartphone and upload a photo of the paper script to the app. A messenger will stop by to collect the original prescription, take it to the pharmacy to be filled and return with your filled medications.

Visiting nurse

While not as common in Italy, visiting nurses can come to your

home and assist with various medical tasks. Available for local nationals or those working on the Italian economy, these medical professionals are usually called upon for serious illnesses. Check with your local provider to see if this may be needed for your condition.

Grocery delivery

If you're homebound, a simple trip to the grocery store may be off the table or just plain exhausting. Thankfully, there are plenty of delivery options in the Vicenza area. Most major grocers, such as Esselunga and Coop, offer online ordering and delivery right to your door. Other online options include Supermercato24 (<https://it.everli.com/it>) and Cicalia (www.cicalia.com/it/).

Food delivery

Cooking may seem a bit daunting when you're recovering and homebound. With the food delivery scene expanding exponentially, there are plenty of delicious local eateries willing to deliver. Apps and websites such as Deliveroo (www.deliveroo.it), Glovo (www.glovoapp.com)

(www.glovoapp.com) and Just Eat (just-eat.it) partner with restaurants to provide fresh and tasty food right to your door.

Cleaning and yard service

Sometimes a little tidy-up around the house and a freshly-cut lawn can brighten the spirits when you're on quarters. There are many local cleaning and yard care professionals ready to offer their services. Be sure to thoroughly vet local companies on sites such as Google and Yelp to ensure good reviews and practices.

Pet care

Looking after Fifi or Fido can cause a bit of a conundrum if you're relegated to your home. Enlist the help of younger neighbors, or check out sites such as Petme.it (www.petme.it) or holidog.com (www.holidog.com) to assist with your furry family members.

Being a homebound patient can prove difficult, even under the best circumstances. Reaching out to helping agencies or seeking out a little extra assistance can help ease the frustration and might help aid a quicker recovery. ■

Dental Care: what to expect

A variety of factors affect whether or not dental care is available for the family of active-duty service members stationed overseas. These factors include facility location, branch of service, deployments and staffing fluctuations. When space is not available, dependents must rely on host-nation providers for their dental needs.

Through a voluntary dental program with TRICARE, military family members stationed in Italy can be sure they receive quality, affordable dental care. Low monthly premiums provide coverage for treatment from civilian providers at host-nation facilities for most dental procedures like cleanings, sealants, braces and dental implants. Although this TRICARE Dental Plan (TDP) in Italy is the same as that in the States, the European plan provides additional coverage and no cost shares for treatments like fillings and root canals.

To locate a preferred provider, visit www.uccitdp.com/tp2opd/. You will be prompted to fill in your duty station and type of dental treatment you're seeking. A list will be generated of preferred providers in your area. Host-nation dentists who qualify as preferred providers must speak English, be licensed in their country and meet a list of more than 15 standards of quality. Also, senior dental officers on installations will visit the offices of preferred providers to assess the quality of care and clinic customer service. For information about TDP enrollment, claims or covered benefits, contact one of the numbers provided in the sidebar or visit <https://www.tricare-overseas.com/contact-us>.

Pediatric Dental Care

Tooth decay is the most common chronic, infectious disease affecting U.S. children. According to the Centers for Disease Control and Prevention (CDC), nearly 20 percent of children ages 5-11 have untreated cavities, or caries; untreated decay can lead to pain and infection that may hinder a child's ability to eat, speak, play and learn.

Tooth decay can be prevented if families develop daily brushing regimens and schedule routine dental examinations and cleanings. Although all dentists can provide medical exams, treatment and advice, consider visiting a pediatric dentist who specializes in children's dental health and provides an office environment and equipment that are designed specifically for kids.

Cleaning Routine by Age

0-2: Before your baby's first tooth erupts, use a soft cloth and gently wipe gums after feedings, during bath time and before bedtime. Gently brush first teeth with an infant finger brush and non-fluoride paste. Avoid nighttime bottles with anything but water, or dipping pacifiers into anything sweet. The American Academy of Pediatrics (AAP) and the American Dental Association (ADA) recommend that you take your child to a dentist by his or her first birthday.

2-5: Help your child brush his/her teeth twice daily (morning and night) with an age-appropriate brush and small amount of fluoride paste. Begin flossing when teeth grow to touch. Limit juices and carbonated drinks, and schedule routine dental exams and cleanings every six months. Discuss your routine and any additional treatments like sealants or fluoride supplements. Sucking on fingers, thumbs or pacifiers can affect teeth and promote decay. If a child does not stop on his own, ask your dentist for helpful tips to discourage the habit by age 3.

5 and up: A child's hand muscles are still developing, so assist with brushing until age 7 or 8. Floss each day, and seek resources for tips on how to floss. Use fluoride toothpaste. Children playing sports should wear appropriate mouth guards. Continue to avoid juices and carbonated drinks, and maintain dental exams and cleanings every six months. Talk with your dentist about your current cleaning routine and areas for improvement.

Promoting Healthy Habits

Brushing and flossing don't have to be such a chore. Several organizations provide educational resources and fun toolkits that encourage healthy dental habits: AAP's Brush, Book, Bed; ADA's Mouth Monsters; 2min2x; Brushing Fun Coloring Book. ■

Birthing a child, while navigating living abroad *as well as a global pandemic, requires trust in the resources and community around you.*

My Birthing Experience

at an Italian Hospital

By Ashleigh Link

Birthing our second child, with the exceptional support of San Bortolo Hospital and our Vicenza Health Community, is an experience we will always cherish. Birthing a child, while navigating living abroad as well as a global pandemic, requires trust in the resources and community around you. San Bortolo Hospital and the Vicenza Health Community provided an empowering journey that brought our daughter safely into our family.

I chose to receive prenatal care through the San Bortolo Obstetrics and Gynaecology (OBGYN). After receiving an initial introduction through the Vicenza Health Clinic, all appointments occurred at the OBGYN clinic in the San Bortolo hospital. The nurses and doctors were attentive, caring and ensured I got to see our daughter each visit. The nurses always made sure I took away a clear ultrasound picture for her baby book! Their willingness to give us time to see our daughter while in utero proved the clinic cared for the emotional, not just physical, well-being of the mother and baby.

Potential language barriers are an initial concern for expecting mothers and support partners. While receiving prenatal care, all health care professionals through the San Bortolo Hospital OBGYN spoke English and

were able to communicate effectively. Additionally, support provided by the Army Community Services New Parent Support Program (NPSP) proved invaluable to our expectant mother community. The nurses were kind, timely and patient with each expectant mother. The nurses were receptive to questions relevant to prenatal care, ever-changing birthing environments due to the pandemic and postnatal care. As information pertinent to expecting mothers changed due to precautions taken during the pandemic, we immediately received a phone call from our NPSP liaison, explaining the updates to birthing procedures and postnatal care. This bridge between the San Bortolo OBGYN and the expectant mother provided a line of clear communication.

Another key resource to alleviating potential language barriers were the San Bortolo Hospital Patient Liaisons. The liaisons reside in the hospital and are available upon your arrival to the hospital. The liaisons attend appointments and translate directly between the patient and the health care provider. The patient liaison was present during all stages of my labor and delivery at San Bortolo. Remember, you and your support partner are your best advocates. If you need help with translation, it is your right to request support from the San Bortolo Hospital Patient Liaisons.

As I began to go into labor, I arrived to the San Bortolo Hospital Emergency Room. Once admitted, I labored in a room alongside another expecting mother until I entered active labor. The nurses contacted my husband, who waited nearby and ensured he was present in the delivery room for the birth of our daughter. During labor, the nurses, midwives, doctors, and patient liaison ensured a healthy, medicated (per my request), vaginal delivery. Immediately upon delivery, the midwife placed my daughter on my chest and my husband eventually cut the umbilical cord. We then were placed in a private room to share two hours of skin to skin with our daughter.

The recovery process at San Bortolo Hospital included both a communal room as well as a private suite. I recovered in a shared room with two other mothers—American and Italian—until a private room became available. Upon receiving a private suite, my husband visited daily during established visiting hours and we were able to bond with our daughter. The recovery was peaceful, non-intrusive and I was able to access help if necessary. My daughter stayed in my private room with me where the pediatrician assessed her health periodically. The health care providers were very respectful and followed proper procedures to ensure my daughter and I did not fall ill to the pandemic. A patient liaison was available, per my request, for any language barrier I encountered. I had zero issues contacting my husband and family during my stay as well.

Upon discharge from San Bortolo Hospital, our community surrounded us with so much support and love. Living abroad, you are typically without immediate family members. Community is incredibly important for expecting mothers and their families during this experience of birthing abroad. Ways you can support an expecting mother are to organize a meal train as well as care for other children in the family while the mother is in active labor or the support partner visits during recovery. With the support we received from our health care providers and friends, we truly will cherish this experience of birthing abroad for years to follow.

➤ Packing Tips for Your Birthing Experience at San Bortolo Hospital

- Save the San Bortolo Patient Liaison's contact information.
- Download Google Translate.
- Pack newborn-sized diapers. The diapers given range in a variety of sizes and may not always include newborn size.
- Pack wipes for diaper changes.
- Pack your newborn's first outfit in a resealable bag so you can easily hand it to the nurses after delivery.
- Postpartum care items for yourself are not provided by the hospital. Pack all personal items for your postpartum care.
- Pack personal entertainment items for yourself, such as a book, magazine or headphones.
- Include your favorite snacks and a long, 220V phone charger with extension cord. ■

HUMANITY IS

Reach Aut was born to provide therapeutic and social support to those who, for work or for life choices, live far from their home and therefore have difficulty in finding support, due to cultural or linguistic issues.

Reach Aut mainly deals with social and psychological health with a transdisciplinary perspective including: Psychology, Speech Therapy, Occupational Therapy, Neuropsychology, Psychiatry and more to come.

Reach Aut puts a particular focus on the support for autism, the specificities of learning and the psychological treatment of trauma. We offer clinical support to any age group from childhood to adulthood.

Our operational offices are currently in Friuli, Veneto and Campania and Spain (Rota), while our registered office is in Cagliari, Sardinia.

Top 5 Foods

to Support Aging and Inflammation

By Dr Nicola Sarandria MD, PhD

Italy

is one of the most iconic birthplaces of the Mediterranean diet. With its population of centenarians, the Italian population has been widely studied for its colorful and refreshing diet, based on fruits, vegetables and extra virgin olive oil.

When discussing diet and its impact on aging and inflammation, one must first consider aging as a multifaceted process that the human body undergoes. Aging involves various processes. Inflammation, which is a complex process, can be acute, sub-acute or chronic, and vital for the human body to survive and fight off diseases or infections. But it can also be detrimental and cause disease. As a matter of fact, the silent chronic inflammation is a leading cause of diseases and oftentimes goes hand-in-hand with aging. This process is correlated with several pathologies such as stroke, myocardial infarction, neurological diseases and oncological diseases. Triggers of this type of inflammation include lifestyle and diet choices.

Diet is fundamental to a healthy and balanced lifestyle. For instance, processed meat, nitrites, rich foods (together with other cancerogenic preservatives), lead-rich vegetables and burnt food (which can sometimes be rich in acrylamide, a cancerogenic substance) can have significant negative impacts to one's health. Therefore, foods like these can be harmful and, in some instances, if chronically consumed, could lead to serious pathologies.

It is important to also categorize foods as functional foods with clear benefits to our body. These include superfoods like green tea and garlic. Common in different cultures and past rural populations, these foods have showed amazing benefits and a need to return to a more rural lifestyle, including physical activity and healthier diets. This includes distancing our eating from fast foods and processed foods and moving closer to raw materials cooked in healthy ways.

A healthy diet must contain the five main food groups. And there is no better place than Italy to enjoy a healthy, balanced and tasty Mediterranean diet!

1 Vegetables and legumes: Italy has many different types of legumes from "fagioli" (beans) to "lenticchie" (lentils), which supply you with fibers, vitamins and proteins.

2 Fruit: Thanks to its climate, Italy has a rich variety of fruits, from Sicilian blood oranges filled with vitamin C to strawberries and lemons.

3 Grains: Italy has a rich history of ancient grains such as "Grano Senatore Cappelli" for amazing pasta dishes and bread.

4 Lean meats/poultry/fish/eggs: Lean and healthy proteins are essential for the sustenance of your muscle mass and the production of antibodies for your immune system. Try Italian trout or sea fishes such as seabass or sea bream for healthy proteins and your daily dose of omega-3 fats.

5 Milk/yogurt/cheese or alternatives (with reduced-fat content): A great example is the amazing fresh yoghurt from the region of Trentino Alto Adige with milk from grass-fed cows contains many beneficial properties such as Omega-3 fats.

Do not forget to add three tablespoons of extra virgin olive oil to your meals each day, which will keep your skin young and help you fight inflammation. Being in Italy, you will be surprised by the vast geographical areas of production of what is known as the "liquid gold" of Italy.

Foods and beverages like soft drinks, sodas and confectionaries can be very high in glycemic value and calories. This might lead to being overweight or obese (a true epidemic in many countries), causing terrifying effects on the human body. As humans, we have forgotten how an excessive intake of food combined with an astounding decrease in physical activity, which unfortunately has been recorded in many countries around the globe, can have a destructive and perhaps one of the most preventable effects on our health and longevity.

Do you want to live a healthy and long life? Then follow these tips for improving your diet, which will surely aid you in your goal while enjoying the colors and flavors of Italian world-renowned foods! ■

SIMPLE WAYS to Improve Your Health

By Betsy Ramirez, MEd, RDN

Do you want to lose weight? Do you want to eat healthier? Do you just want to improve your overall health? This may even seem unattainable, but it doesn't have to be. Making small changes every single day can improve your health and well-being.

Use the **SIMPLE** strategy to get you on track to a healthier life.

SIP ON MORE WATER.

Your body needs water for better metabolism, circulation, waste removal and temperature regulation. Your health can be adversely affected if you aren't drinking enough H₂O. A recent study in the European Journal of Nutrition found that even mild dehydration may impair cardiovascular function. ⁽¹⁾

How much do you need?

According to the USDA, your water needs depend on your age, activity level and outdoor temperature. Most children require around four cups a day and adults need no fewer than eight cups a day. ⁽²⁾

Signs you aren't drinking enough water: ⁽³⁾

- ▲ Thirst
- ▲ Dry mouth
- ▲ Decreased urine output and darker urine
- ▲ Sleepiness or tiredness
- ▲ Headache
- ▲ Dizziness
- ▲ Constipation

INCREASE YOUR FRUIT AND VEGETABLE INTAKE.

You can decrease your risk for chronic diseases like heart disease, diabetes and cancer just by increasing your fruit and vegetable intake. You can save yourself trips to the doctor by using food as preventive medicine. Fruits and

vegetables contain antioxidants and fiber that help prevent disease.

The USDA's MyPlate key message of making half your plate fruits and vegetables gives a great visual of what we need each day. Make it a goal to get in no fewer than two servings of fruit a day and three servings of vegetables. Seven to 12 servings a day has shown even more health benefits. Make fruits and vegetables an intentional part of your day.

7 easy ways to get more produce in your day

1. Eat fruit for breakfast! Place it on your cereal, oatmeal or yogurt.
2. Grab fresh fruit when heading out the door.
3. Have fruit with nuts for a mid-morning snack.
4. Make half your plate fruit and vegetables at lunch and dinner.
5. Have veggies with dip for a snack.
6. Dip apples slices in peanut butter.
7. Have a fruit and veggie plate on hand if your family tends to snack a lot, especially before dinner. ⁽⁴⁾⁽⁵⁾⁽⁶⁾⁽⁷⁾⁽⁸⁾

MOVE MORE.

The Physical Activity Guidelines for Americans recommends a minimum of 150 minutes of physical activity a week for adults; this includes both aerobic and resistance training. Children and adolescents should be getting at least 60 minutes of physical activity a day. ⁽⁹⁾

Ways you can move more

- ▲ Take a walk with your family.
- ▲ Park farther away from a store or building.
- ▲ Take the stairs.
- ▲ Enroll in a fitness class with a friend or family member.
- ▲ Utilize online fitness videos or DVDs.
- ▲ Workout in the morning.
- ▲ Walk your pet.
- ▲ Ride your bike.
- ▲ Play ball with your kids.

PLAN YOUR MEALS AND SNACKS.

Planning ahead makes healthy eating so much easier. Choose a day to map out your week for breakfast, lunch, dinner and snacks. Keep a binder to stay on track, and use it to store your favorite go-to recipes. Prepping fresh veggies or fruit for snacks ahead of time will save you time, and they will be ready to go when you need them.

LIMIT YOUR SUGAR INTAKE.

The USDA's 2015-2020 Dietary Guidelines for Americans has finally addressed sugar consumption. The recommendation is limiting added sugar consumption to 10 percent or less of your total daily caloric intake. ⁽¹⁰⁾

It's important to know the difference between added sugars and natural sugars:

- ▲ Natural sugars occur in fruit and milk/milk products.
- ▲ Added sugars are added to products and have no nutritional value.
- ▲ The FDA has recently updated the Nutrition Facts Label Added sugar has been added to the label under carbohydrate.

EVALUATE WHERE YOU ARE.

Take the time to evaluate where you are in your life and what small changes you can make. Talk to your doctor about your intentions to make these changes and see if you can enlist the help of other health care professionals, like a dietitian. Finally, be mindful of how you treat your body. Ask yourself if the foods you are choosing are nourishing. If you aren't moving, start small and add in physical activity one to two times a week. ■

» Pet Health

by Stripes Staff

Checklist for Pet Parents

- Register international micro-chip.
- Keep rabies vaccination current.
- Register with military vet.
- Find Italian vet clinic.
- Get pet passport and ID tags.
- Purchase pet insurance.
- Give flea and tick treatment.
- Schedule Lyme disease vaccination.

The Basics

The majority of regulations for domestic animals are related to dogs, cats and ferrets. To enter Italy, you should have furnished proof that your pet has an international micro-chip, a current rabies vaccination that meets OIE standards and a certificate of health. Be sure to keep the Leptospirosis vaccine current as it has a heavy presence in Italy. Because fleas and ticks are also prevalent, consider preventive treatments. There is also a Lyme disease vaccination available for dogs.

Within ten days of your pet's arrival or adoption, you should register with the local military vet clinic and register the micro-chip. Your pets must have identification tags and should not wander freely. You are responsible—and can be sued—for damages to individuals or property caused by your pet, so purchase liability insurance. Coverage is inexpensive and will save you from any future headaches.

Travel

Planning to travel without your pet? Be sure to find a kennel now as they can be booked for months in advance for the summer and Christmas season. You'll also need pet passports before traveling around Europe.

Emergencies

Most installation vet offices do not provide after-hours emergency care, so ask for a list of clinics on the Italian economy. Visit a couple to find one that is right for you and establish a relationship so that you will feel confident going there if an emergency arises. ■

Camp Darby is a base without a Military Treatment Facility. Therefore, every patient needs to rely on the services offered on the economy. Camp Darby has a network of providers that anyone can use regardless of their rank or status. Since the facilities listed are mainly public, they are covered under the so-called socialized medicine system. These providers can have a longer than expected booking appointment time and may request payment upfront. Private facilities may provide easier access, faster booking times and accept almost all insurance plans. Be aware that most doctors work in both places, therefore, the quality of care is the same.

HEALTHCARE RESOURCES

» *Camp Darby*

PATIENT LIAISONS

To schedule an appointment or to obtain more information, you can contact the medical liaisons (HIPAA certified Camp Darby translators) at the following contacts:

Shared E-Mail: darbypatientliaison@army.mil

Shared office phone: 633-8346 (DSN), +39 050 548346 (Commercial)

Hours: Monday-Friday, 8 a.m.-12 p.m./1-5 p.m.

Location: Headquarters, Building 113 on Camp Darby. The office entrance in the main lobby is locked to protect patient privacy. A courtesy DSN phone is always available in the main lobby.

Among the services provided, the patient liaisons offer the following: translations, in-person and over-the-phone assistance, after duty hours assistance, medical and dental information, OB orientation, newborn birth registration information, ISOS Tricare authorizations assistance, Tricare claims filing assistance for reimbursement, private insurance claim assistance in/out processing briefing and newcomers' individual and group briefings.

Cultural differences and preparation for certain procedures will also be discussed prior to the appointments, although this office is not responsible for providing medical advice. Patients are responsible for transportation to and from their appointments. ■

This is the dental office with no language barriers that you are looking for.

Having lived in Texas all the way through High School, for Dr. Davide Oberholtzer and Ilaria, the Office Manager, **English is the first language.** Dr. Ludovico Martini also studied in the U.S. as a foreign exchange student in Pittsburg, and is fluent in English as well.

In our dental office, you don't run the risk of getting lost in translation!

We are here to help you thoroughly understand the services we provide in order to meet your oral health needs.

SERVICES WE PROVIDE

- oral hygiene and prevention for adults and children
- cosmetic, reconstructive, and prosthetic dentistry
- orthodontics and clear aligners
- implant dentistry (with American implants)
- periodontal treatment
- radiographs, panoramic x-rays, and CT scans
- paediatric dentistry
- conscious sedation with nitrous oxide
- oral surgery (extractions and bone reconstruction)
- one-day dentistry
